2. BUILDING LINE. Front yard set back lines, and side yard set back lines on corner lots are to be as shown on the plat, between which lines and the property lines of the street there shall be no buildings or structure erected or maintained.

The developer may modify this restriction in the event he justifies it by tree location or topography. This will be noted and recorded in the court house.

3. UTILITY EASEMENTS AND DRAINAGE. All easements shown as "Utility Easements" are also to be considered drainage easements and are subject to all restrictions of drainage easements. No permanent, or other structures are to be erected or maintained upon any easements shown upon the plat and owners of lots shall take their titles subject to the rights of the above described easements.

4. LAND USE AND BUILDING TYPE. No lot shall be used except for residential purposes, nor shall any lot be subdivided. No buildings shall be erected, altered, placed or permitted to remain on any lot other than one single family dwelling not to exceed two stories in height and a private attached garage for not more than three cars. In the event the purchaser should buy two lots with the purpose of building one single family dwelling across the center lot line, the lot line restrictions shall not apply to the boundary lines dividing any two said lots.

5. NON-RESIDENTIAL STORAGE BUILDING: A limit of one such building. Restrictions on the type, size, construction and location are listed below.

- A. Type - Conventional or Red Barn variety.

- D. Location - In the middle and to the back of the lot.

6. ARCHITECTURAL CONTROL. No building shall be erected, placed or altered on any lot until the construction plans and specifications and the complete plot plan have been approved by the Architectural Committee, as to the quality and type of material and workmanship, in harmony with external design and with existing structures of finished grade elevations. The ground floor of the main structure, exclusive of open porches and garages, shall not be less than 1400 square feet, or at least 900 feet on the first floor of houses of more than one story. (Determination of sufficiency and adequacy of the term "ground floor of main structure" with respect to dwellings of a tri-level, bi-level and one and one-half story design shall rest exclusively with the Architectural Committee). All Drainage conduits or tubes for individual lot driveways shall be subject to approval as to size, material and quality of construction by the Project Engineer.

7. BUILDING LOCATION. No building shall be located on any lot nearer to the front lot line, nor nearer to the side street lines than the minimum set-back line shown on the record plat. For the purpose of this covenant, eaves, steps and open porches shall not be considered a part of the building,

provided, however, that this shall not be construed to permit any portion of a building on a lot to encroach upon another lot. After the building has been staked and before construction begins, the Project Engineer must confirm the location of building with the plat plan.

8. No SWIMMING POOL or ASSOCIATED STRUCTURE shall be erected or placed on any lot until the construction plans, including a plot plan, have been approved by the Architectural Committee.

The same sight line limitations shall apply on any lot within ten feet from the intersection of a street's property line with edge of a driveway. No trees shall be permitted to remain within such distance of such intersections unless the foliage line is maintained at such height to prevent obstruction of such sight lines.

14. SIGNS. No sign of any kind shall be displayed to the public view on any lot, except one sign of not more than five square feet, advertising the property for sale or signs used by a builder to advertise the property during construction and sales period.
