#### ARTICLE V: STANDARDS RELATING TO IMPROVEMENTS

Section 1: General. The following standards create a minimum code of uniformity for the construction of homes and/or outbuildings within the Subdivision.

Section 2: Minimum Square Footage. The principal dwelling on any Tract must have a minimum fully enclosed ground-floor area devoted to living purposes of no less than sixteen hundred (1600) square feet; except if said dwelling has multiple levels, the minimum living area of the first floor area may be reduced, provided that the total living area of the multiple levels is not less than two thousand (2000) square feet. Said minimum square footage standards are exclusive of basements, walkout basement, porches, terraces and attached garages.

Section 3: Additional Criteria for Home Exterior. Unless otherwise approved by the Committee in writing, a home constructed on any Tract must have no less than twenty percent (20%) of the exterior surface covered with appropriate masonry, stone, and/or dryvit® (or similar type of exterior insulated finish system), exclusive of fireplace chimneys. Roofing materials must be approved by the Committee and may include "T-lock" and/or laminated asphalt shingles with minimum twenty-five year manufacturer warranty, shake shingles, Woodruff® shingles (or equivalent brand), tile, or other roofing products approved by the Committee.

Section 4: Attached Garages. All dwellings on any Tract shall have an no less than a three- (3) car attached garage.

Section 5: Location and Orientation of Improvements/Minimum Building Setbacks. A site plan depicting the location and orientation of all proposed improvements must be submitted and approved by the Committee as provided for in Article IV hereinabove. The proposed location and orientation of improvements upon a particular Tract are important factors considered by the Committee taking into account, among other things, the topography of the particular Tract, the views, and the desire to maintain a maximum degree of symmetry, harmony, and balance among all improvements situated within the Subdivision. Inasmuch as each Tract and the intention of each Owner for construction there on presents a unique setting, each site-plan shall be evaluated and approved by the Committee on a case-by-case basis rather than attempting to specify detailed requirements for the location and orientation of improvements herein. As a general rule, however, the following minimum criteria shall apply subject to the case by case evaluation by the Committee during the approval process.

With respect to proper orientation of a home upon a Tract, any home shall – unless otherwise approved by the Committee–be situated upon a Tract so that the front elevation of the home generally faces the road from which the home is accessed. There are several Tracts, which may be accessed from alternative roads. In such cases, the home may face either road subject to approval from the Committee taking into consideration, among other things, the orientation of homes in close proximity and the intent to maintain a maximum degree of symmetry, harmony and balance among all improvements, situated

within the recorded Subdivision. Additionally, the Committee may consider the topography of a Tract, which merits the orientation of a home in a manner other than described in this paragraph.

With respect to the location of improvements upon a Tract, the following minimum setbacks shall be required in relation to front, rear, and side property lines. The minimum setbacks for the front of all Tracts (Except those Tracts listed below) shall be no less than one hundred and twenty (120) feet. The minimum setbacks for the sides of all Tracts shall be no less than ninety (90) feet. The minimum setbacks for the rear of all Tracts shall be no less than ninety (90) feet, unless otherwise approved in writing by the Committee.

Tracts 16 Through 26, Tracts 28 through 45, and Tracts 52,54,55,56, and 59 shall have a Side Setback requirement of Fifty (50) feet or as deemed appropriate by the Committee.

Variances to the Front and Side Set-Back requirements as set forth hereinabove may be granted by the Committee on a case by case basis.

With the exception of fencing, in all cases the aforementioned setbacks shall pertain to any and all permanent improvements of any nature including, but not limited to, wells and septic systems.

An Owner may combine two or more Tracts as a homesite subject to the following considerations: An Owner combining two or more Tracts as a homesite must carefully consider the placement and location of any home dwelling, outbuildings and/or barns to be constructed upon the combined tracts in light of the possible future separation and sale of the combined Tracts individually. In these regards, when selling individual Tracts that were previously combined, each Tract (when separated) is subject to the minimum setback requirements as set forth hereinabove. Furthermore, these covenants prohibit the erection of an outbuilding and/or barn prior to the construction of a residence (see Article V, Sections 6 and 7 hereinafter). Similarly, an Owner who has combined two or more Tracts as a homesite and who has constructed a home dwelling on one of the Tracts and an outbuilding and/or barn on the other Tract, may not separate the Tracts for individual sale unless demonstrating to the satisfaction of the Committee that a residence shall also be timely constructed upon the Tract with the outbuilding and/or barn. The purpose of the preceding provision is intended to prohibit the use of an outbuilding and/or barn if the Owner does not also reside in a home dwelling upon the Tract. Notwithstanding anything hereinabove to the contrary, the interior lot lines of combined Tracts may be disregarded and the applicable setbacks shall be computed from the exterior lot lines of said combined parcel if the combined parcel is not, thereafter, separated, the interior lot lines of said combined parcel may be disregarded and the applicable setbacks shall be computed from the exterior lot lines of said combined parcel.

Section 6: Outbuilding. No more than one (1) outbuilding (not including barns) shall be permitted on any Tract. Unless otherwise approved by the committee in writing, the maximum size of any outbuilding shall be 3200 square feet and the maximum height of the sidewalls and/or eaves of any outbuilding shall be 14.00 feet.

The distance and location of an outbuilding in relation to the home and other improvements must be approved by the committee, the intent being that the respective improvements must be appropriately integrated. Construction of any outbuilding shall not proceed, but may be contemporaneous with, or subsequent to, the construction of the residence. In any event, no outbuilding may be utilized until the residence is complete and occupied.

Any plan for an outbuilding must be submitted and approved by the Committee as provided for in Article IV hereinabove. The additional criteria for home exteriors (in Section 3 above) do not apply with respect to outbuildings. The Committee shall permit engineered prefabricated metal buildings subject to approval.

Section 7: Barns. In addition to an outbuilding as provided for in the preceding section, one (1) barn/stable facility shall be permitted on any Tract. Unless otherwise approved by the Committee in writing, the maximum size of any barn/stable facility shall be 2400 square feet and the maximum height of the sidewalls and/or eaves of any barn/stable facility shall be 12.00 feet.

The distance and location of a barn/stable facility in relation to the home and other improvements must be approved by the Committee, the intent being that the respective improvements must be appropriately integrated. Construction of any barn/stable facility shall not proceed, but may be contemporaneous with, or subsequent to, the construction of the residence. In any event, no barn/stable facility may be utilized until the residence is complete and occupied.

Any plan for a barn/stable facility must be submitted and approved by the committee as provided for in Article IV hereinabove. The additional criteria for home exteriors (in section 3 above) do not apply with respect to barns. Engineered prefabricated metal barns shall be permitted subject to approval by the Committee.

Section 8: Tract Approaches and Protection of Ground Cover. An approach for vehicular traffic onto a Tract must be installed at the commencement of any construction upon said Tract in order to protect the shoulders of the road and the natural turf. The approach must be permitted and built to county standards for Laramie County, Wyoming. Owners shall direct all vehicular traffic, for construction purposes or otherwise, to enter and exit only upon said approach and to use one path leading to and from the construction site in order to protect and preserve the native ground cover.

Section 9: Interior Access to Tracts. With the exception of Tracts 1 through 12, all Tracts within the Subdivision shall be accessed off of the public roadways situated within the interior of the subdivision. Tracts 1 through 12 may be accessed off of Klipstien Road (with County Approval).

Section 10: Utility Connections. All utility lateral and/or service extensions from the main line to the home and/or other improvements shall be underground.

Section 11: Fences. Privacy fencing and/or boundary fencing is allowed subject to Committee approval. Any and all boundary fencing to be constructed subsequent to the time of the filing of these covenants shall not include barb wire, sheep wire, or steel "T-posts" unless approved by the Committee. Owner must keep fencing in a state of good repair and must promptly remove any accumulation of trash and/or debris against the same. Any snow and/or wind fencing shall be utilized on a seasonal basis only and shall not be erected before October 1<sup>st</sup>, and shall be removed by June 1<sup>st</sup>, of any calendar year.

Section 12: Maintenance of Homes and Improvements. All Owners shall maintain or provide for the maintenance of homes and improvements upon their Tracts. Tracts shall be kept free from noxious weeds which, in the reasonable opinion of the Committee, constitute a nuisance or are likely to spread to neighboring property.

Section 13: Similarity in Housing. A proposed dwelling, which has an exterior elevation appearance substantially similar to a dwelling already existing, under construction, or previously approved for construction may not be built in close proximity (as the Committee determines "close proximity") to the dwelling already existing, under construction, or previously approved for construction.

Section 14: Outside Flood/Area Lights. Unless otherwise approved by the Committee, only one (1) freestanding light poles for automatic all-night flood/area lighting, of the type available through Excel Energy, is acceptable on any Tract. This paragraph is not intended to otherwise prohibit other exterior lighting incidental and/or attached to homes, outbuildings and /or barns.

Section 15: Rebuilding or Restoration. If any residence or other improvement is destroyed in whole or in part by fire, windstorm or from some other cause, it must be rebuilt or all debris must be removed and the Tract restored to a sightly condition. Any such rebuilding or restoration must be commenced within three (3) months after the damage or destruction occurs and, thereafter, diligently pursued to completion within a reasonable time- not to exceed one (1) year after the date the damage occurred unless a longer period is otherwise approved by the Committee due to unusual circumstances.

#### ARTICLE VI: LANDSCAPING

Section 1: Landscaping. In order to enhance each Tract and homesite and to promote a harmonious and integrated appearance among all Tracts, the following minimum landscaping standards shall apply:

A. Trees. Within two (2) years after the completion of construction of the primary residence, an Owner shall plant and maintain no less than ten (10) trees of any variety which have the following minimum height requirements: Any coniferous tree shall be no less than four (4) feet tall when planted and any deciduous tree shall be no less than eight (8) feet tall when planted. Nothing herein shall be construed to prohibit an Owner from planting any number of trees less than the minimum height requirements in addition to the required ten (10) trees, which meet the minimum height requirements. No unsightly shelter or wind protection from trees such as used tires or as otherwise determined by the Committee shall be permitted. Any dead trees shall be removed from the premises.

B. Turf/Yards. Soil immediately surrounding a homesite, which has been disturbed during the construction phases, shall be reseeded with a native turf mix or other grass of Owner's choice within one (1) year after the completion of construction of the primary residence. The use of drought-resistant and/or low-maintenance grass is encouraged for purposes of a groomed lawn. Trees, shrubs, or other landscaping elements such as rocks, wood chips, bark and mulched or graveled materials are also acceptable. Drip irrigation systems for trees and/or shrubbery are permitted without restriction.

No more than a total of four (4) horses and/or Llamas, collectively, may be kept for recreational purposes on each Tract. The maximum number of horses and/or llamas per tract may be exceeded by one (1) horse and/or llama only in the event of the birth of an offspring; however, this exception shall expire after one hundred and eighty (180) days. In any case where an Owner elects to have horses and/or llamas, upon the Tract permitted, adequate barn/stable facilities and adequate non-grazing feeding arrangements must first be demonstrated to and approved by the Committee. Under no circumstances shall extreme and/or severe grazing be permitted. The boarding of any animals not belonging to the Owner of the Tract is prohibited. The operation of commercial stables and/or riding arenas is prohibited. Approved barn/stables and/or corrals shall be maintained in compliance with the lawful sanitary regulations.
