 This is to certify that the survey and subdivision of "Englewood" as shown hereon and comprising the Southeast One-quarter (SE 1/4) of Section Seventeen (17), Township Thirty-four (34) North, Range Seventy-nine (79) West of the Sixth Principal Meridian (6th PM) was made by me during September, A.D. 1922 at the request of, and for, John M. England.
 The survey was executed with a Gurley transit and a 300 ft. steel tape. Each lot corner along the Salt Creek Highway is a 4"x4"x30" pine post set 24" in the ground, painted white with the appropriate lot number painted thereon in black. All other lot corners are marked with 2"x3"x24" pine posts set 18" in the ground, painted white and numbered in black.
 The southeast and northeast corners of the section are the original government corners, the southeast corner being a plain marked stone and the northeast corner being four plain pits. All other corners were established according to the prescribed rules of the U.S. Land Office.
 All linear dimensions and all angles given on this plat were measured with care, and are correct to the best of my knowledge and belief.
 Witness my hand and seal, this 6th day of October, A.D. 1922.
