This to certify that the survey and subdivision of "Evansville" as drawn hereon and comprising a part of Lot 2 and SWNE, Sec. 1, T33N, R.79W of the 6th P.M. was done under my supervision during the month of January A.D. 1922 at the request and for Williams T. Evans. The survey was executed with a Buff & Buff transit and a 300ft. steel tape. Each block corner is marked with a 4"x4"x30" pine post set 2ft. in the ground and tacked. The corners at the ends of the alleys in each block are marked with 3"x3"x24" pine posts set 20" in the ground and tacked. Each lot corner facing a street is marked with a 2"x2"x16" pine stake driven 12" in the ground.

The Southeast and Southwest corners of Section 1 are government marked stones. The Northwest corner is a galvanized iron pipe established previously on an arbitration survey and used in platting "Oildale Acres." The northeast corner is a 3/4"x6' galvanized iron pipe driven 4 1/2 ft. in the ground and was established by double proportionment during a joint survey made in December A.D. 1921 by Walter Storrie, Engineer for Wyoming Refining Co., and myself. The East 1/4 corner and North 1/4 corner are car axles driven firmly in the ground and were established by single proportionment during survey last mentioned. The W 1/4 corner is an iron bolt used in platting "Oildale Acres." The South 1/4 corner is an iron pin established by previous surveyors. The 1/16 corners are as shown on the plat and were determined according to prescribed rules of the U.S. Land Office. All angles and linear measurments were made with care and to the best of my knowledge and belief are correct within reasonable limits of error.

Witness my hand and seal of a licensed surveyor this 3rd day of March A.D. 1922.
