The survey was executed with a Gurley transit and a 300 ft. steel tape. Each block corner is a 4" x 4" pine post and each intervening lot corner is a 1/2" x 1/2" pine stake set firmly in the ground. The corners of this subdivision were determined by survey from existing government corners according to the prescribed rules of the U.S. Land Office.

All linear dimensions and all angles were measured with care and are correct to the best of my knowledge and belief.
