Evansville, WY 82636

Suedes Simple Subdivision Lot 1 and 2
S ½ SW ¼, Section 34, Township 34 North, Range 77 West
Natrona County Wyoming

In the matter of Suedes Simple Subdivision, the approval is based on the following conditions:

1. Due to the acreage, development of dwellings is possible in multiple locations. Ground water was encountered on May 16th, 2011 at 4'8" on Lot 2 and 5'6" on Lot 1. At the time of development, an additional trench inspection will need to be performed to verify the ground water levels. Septic systems in this area will likely have to be pressured dosed mounded type systems due to the potential for seasonally high ground water.
2. Since the soil is excessively permeable, any septic system that is installed on either of these two lots shall have a loamy sand fill material placed 2' below the bottom of the drainfield to slow down the effluent to ensure proper filtration.
